Games - Challenge mode

Overview

The target audience of my website is other fellow David Attenborough admirers or fans.

The idea behind the website is that users will be able to play David Attenborough themed games, earn 'David Dollars' (the currency of my website) and use the David Dollars to buy and collect virtual stickers.

Neilson's Heuristics used

- ☑ Visibility of system status
- ☑ Match between system and the real world
- ☑ User control and freedom
- ☑ Consistency and standards
- ☑ Error prevention
- ☑ Recognition rather than recall
- ☑ Flexibility and efficiency of use
- ☑ Aesthetic and minimalist design
- ☑ Help users recognize, diagnose, and recover from errors
- ☑ Help and documentation

Future Improvements

- Add a wider selection of mini games to the website to encourage more users to play.
- Allow users to be able to create an account. This will allow for a lot more features, i.e. chatting with other users, posting your accomplishments etc.

Lessons Learned

- Planning first is important.
- Your actual website may differ a lot from your prototypes!
- CSS is just trial and error.
